construction fencing between the 2 rings
Starters/Advanced ring approx 95' wide and 90' deep (usable space). Approximately 4.5' high concrete wall on either side of the arena, with raised bleachers on both sides. Can use only the left side for exit and entry, although you can put your start and finish on either side. We use the area behind the scribe/timer table to either bring dogs out to the start or allow them to exit after the next dog starts. We also have baby gates.
S
actually we have e timers
F
entry is about 10 feet in from the outer wall
entry/exit
Tables for judge and timer/scribe
trailer
holding area to facilitate moving dogs into or out of the ring
